

Cutting fluid for minimal lubrication

Application

Cimtech MQL is a clear, mineral and non-watermiscible oil free synthetic lubricant especially designed for minimal lubrication operations. The product does not contain chlorine, sulphur, heavy metals, silicons and biocides.

Application

Cimtech MQL is a wide range minimal lubrication product for medium to heavy duty machining operations on all ferrous and most non-ferrous metals. Cimtech MQL is a product suitable mainly for milling, turning, sawing, and thread cutting operations on minimal quantity lubrication systems.

Features and benefits

- Provides excellent lubrication over a wide range of applications and materials.
- Longer tool life due to its special selected components.
- Mineral oil free. It will not smoke or burn.
- No residues left on parts and machines creating a pleasant working environment.
- Minimum stock holding.
- No in-use care and attention necessary.
- Produces “near-dry” chips with increased value.
- No metalworking fluid disposal costs.
- Very low product consumption.

Methods of application

Cimtech MQL is used as received. It can be used with the most common micro-lubrication systems available on the market.

Handling and storage

Protect from freezing, direct sun and store between 5-35° C.

Packaging type

1, 5 and 25 litre.

Safety Data Sheet

The Safety Data Sheet should be consulted for specific information and information on Health, Safety and Environment when handling this product.
